

TRR**374**Tubular system and interstitium of the kidney:
(Patho-) physiology and crosstalk

Seminar

Prof. Dr. Detlef Böckenhauer

University Hospital Leuven and
PKD Research Group, Department of Cellular and
Molecular Medicine, Katholieke Universiteit Leuven

Genetic insights into kidney function

Prof. Böckenhauer is a pediatric nephrologist at the University Hospital Leuven and professor at the Faculty of Medicine of the Catholic University of Leuven, where he is a member of the PKD Research Group at the Department of Cellular and Molecular.

As a pediatric nephrologist, he is interested in the causes of kidney disease in his patients, especially the genetic causes of tubular diseases.

Time: Monday, November 4, 2024, 16:30h
Location: Seminarraum Physiologie
VKL 4.1.29
Universität Regensburg
and Zoom
