bernd.kramer@ur.de

registration until Wednesday, 17 April 2024
Vorbesprechung: Seminarraum DE_0.133
9.00 Uhr

Prof. Dr. Bernd Kramer
Institut für Zoologie

Regensburg, 22 January 2024

Not only our own life, but also the lives of animals are marked by both conflict and cooperation with conspecifics. In animals, cooperative interactions are often limited to relatives or sex partners, but conflict may arise about resources and their distribution. In this English-language seminar, we discuss recent papers at the forefront of cooperation-and-conflict research.
