**Seminar
des Institutes für Physikalische und Theoretische Chemie
für wissenschaftliche Mitarbeiter und Studenten
nach der Bachelorarbeit
Sommersemester 2021**

Mittwoch, 17.00 Uhr, digital

Datum	Name	Thema
Mittwoch, 21.04.2021	Dr. Petyr Karageorgiev University of Regensburg	Sicherheitsunterweisung
Mittwoch, 28.04.2021	B. Sc. Christoph Bruckschlegel	Origin of the superchaotropic effect of nano-ions investigated by QCM
Mittwoch, 05.05.2021	B. Sc. Thomas Frank University of Regensburg	Removal of Polymers from hard surfaces
Mittwoch, 12.05.2021	B. Sc. Seyedehelahe Bagherimetkazini	The study of 1,2-pentanediol as a potential bio-solvent alternative
Mittwoch, 19.05.2021	B. Sc. Lea Rohr University of Regensburg	NADES as fragrance and flavour delivery systems
Mittwoch, 26.05.2021	B. Sc. Oliver Walker	Thin layer of organosilanes having specific functionalities for the understanding of REE extraction
Mittwoch, 02.06.2021	B. Sc. Diana Funkner University of Regensburg	Nanoparticle Synthesis in Silica Matrices
Mittwoch, 09.06.2021	B. Sc. Selina Reigl University of Regensburg	Phase selection/control in Mineral Crystallisation
Mittwoch, 16.06.2021	B. Sc. Katarzyna Krzemien University of Regensburg	Dissolution of wax depositions in crude oil pumps and pipelines
Mittwoch, 23.06.2021	B. Sc. Katharina Poiger University of Regensburg	New innovative approaches for formulations in cosmetics
Mittwoch, 30.06.2021	Professor Dr. S. Polarz Universität Hannover	Surfactants with added value
Mittwoch, 07.07.2021	B. Sc. Chantal Walser University of Regensburg	New approaches to polymerisation reactions in microemulsions
