

eVote - Internet Based Electronic Voting System

European Union FP5 ISTproject

e-VOTE has been an EU-funded project in FP5 (IST-2000-29518) The aim of the project was to design, implement and validate an Internet based electronic voting system that provides all required services for organizing and conducting a voting process. The project was conducted by an international consortium. Our research group has been primarily occupied with the quality management within the project.
