SecTech
- Innovation and Excellence in Cyber-Security teaching in Higher Education

European Commission - ERASMUS+ (2017 – 2019)

The complexity of today's digital world implies there is no single solution to IT-Security problems, only the combination of a set of techniques and measures could allow the provision a comprehensive cyber-security. Luckily, expertise in some of the core facets of the domain are scattered around research and academic institutions throughout Europe. In SecTech, a Strategic Cooperation amongst some of those leading European Organization and research groups elaborates a joint cyber-security curriculum and environment that will bring more excellence in the cyber-security education in HE and positively contribute to the EU strategical reform on modernisation and opening up of the education system.
